DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Saturday, 17 June 2023 at 05:38 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Much of the UK will have Moderate air pollution levels, but with a chance of isolated areas of High pollution levels occurring, these most likely across England.

Tomorrow: Although large areas of Moderate air pollution are still expected across the UK on Sunday, there may be more areas with Low air pollution, especially across southern England and south Wales.

Outlook: Through the period the areas of Moderate air pollution are expected to reduce, becoming isolated by Wednesday and largely confined to eastern areas of the UK. Therefore Low air pollution levels will become dominant.
